

model::Ghost::chooseFacing
PacmanDirection

model::Ghost::update

model::World::getPacMan

```
graph LR; A["model::Ghost::chooseFacing  
PacmanDirection"] --> C["model::World::getPacMan"]; B["model::Ghost::update"] --> C;
```

The diagram illustrates two method calls from the left pointing to a single target method on the right. The target method, 'model::World::getPacMan', is highlighted in a grey box. Two blue arrows originate from the left: one from 'model::Ghost::chooseFacing PacmanDirection' and another from 'model::Ghost::update', both pointing towards the target method.
