

view::state::LevelState  
::LevelState

view::state::MenuState  
::MenuState

util::TextureManager  
::loadScoreFont

```
graph LR; A["view::state::LevelState  
::LevelState"] --> C["util::TextureManager  
::loadScoreFont"]; B["view::state::MenuState  
::MenuState"] --> C;
```

The diagram illustrates a dependency or call relationship. On the left, there are two white rectangular boxes. The top box contains the text 'view::state::LevelState' followed by '::LevelState' on a new line. The bottom box contains 'view::state::MenuState' followed by '::MenuState' on a new line. On the right, there is a gray rectangular box containing 'util::TextureManager' followed by '::loadScoreFont' on a new line. Two blue arrows originate from the right side of the white boxes and point towards the left side of the gray box, indicating that both state objects interact with or call the 'loadScoreFont' method of the 'TextureManager'.
