::PacManView

util::TextureManager
::getPacManFrames

```
graph LR; A["view::entity::PacManView::onNotify"] --> C["util::TextureManager::getPacManFrames"]; B["view::entity::PacManView::PacManView"] --> C;
```

The diagram illustrates two calls to the `util::TextureManager::getPacManFrames` function. The first call originates from the `view::entity::PacManView::onNotify` method, and the second call originates from the `view::entity::PacManView::PacManView` constructor. Both calls are represented by blue arrows pointing to a gray box containing the function signature.
