

view::state::MenuState
::handleEvents

view::state::LevelState
::update

view::state::StateManager
::switchState

```
graph LR; A[view::state::MenuState::handleEvents] --> C[view::state::StateManager::switchState]; B[view::state::LevelState::update] --> C;
```

The diagram illustrates a dependency or call relationship. Two source functions, 'view::state::MenuState::handleEvents' and 'view::state::LevelState::update', are shown in white boxes on the left. Two blue arrows point from these source functions to a single target function, 'view::state::StateManager::switchState', which is shown in a gray box on the right.
